

Patrick Pangilinan

patrick_pangilinan@dlsu.edu.ph ❖ (0960) 693-7386 ❖ Lipa City, Batangas, Philippines

A diligent 4th Year Computer Science student with a penchant for programming and Front-end Development, along with a passion for graphic design. Experienced with tools such as GIMP and Inkscape, with the addition of expertise in React and VueJS.

WORK EXPERIENCE

Pixel8 Web Solutions & Consultancy Inc. - Digital led creative agency **April 2023 - Present**
Front-end Developer Intern *Remote*

- Leveraging Vue.js, Quasar framework, and Axios to seamlessly translate mock-up designs into highly responsive web applications, delivering exceptional user experiences.
- Responsible for the creation and integration of 5 vital modules within client applications, ensuring seamless functionality and user satisfaction.
- Coordinating and guiding a dynamic team of 3 developers, fostering collaboration and efficiently delivering multiple modules for diverse web applications.
- Providing guidance to 4 group leaders, establishing and enforcing standardized procedures and Git CLI commands for effective project execution.
- Meticulously implementing a detail-oriented approach to guarantee responsiveness across all viewports and optimize web performance for enhanced user engagement.

Innospire IT Solutions - IT startup specializing in contact IT Solutions **2019 - 2 weeks**
Student Intern *Batangas City*

- Produced a logo that continues to be used by the organization, as well as a Business Profile, Website, Business Card, ID, and other visual materials.
- Achieved an outstanding performance, earning a grade of 99% from the company, for exceptional work delivered.
- Expanded technical expertise by gaining experience with HTML, CSS, and JavaScript.
- Mentored a fellow student intern on the use of software such as GIMP and Inkscape for the design and production of visual materials for the company.

LEADERSHIP EXPERIENCE

Senior High School Thesis Leader

Voucher Recipient's Database System

2018 - 2019

Batangas Eastern Colleges

- Led a team of 3 researchers in developing a database system using Visual Basic and MySQL, aimed at improving the school registrar's office's data management and organization.
- Demonstrated strong leadership skills throughout the project, including effective communication, task delegation, and project management.
- Overcame technical challenges and refined the system through rigorous testing, resulting in a successful proof of concept for an offline database system capable of storing student voucher information.
